Imtiaz Hossain

Data Analyst

Dhaka, Bangladesh | +880 1864-091332 | epty9851@gmail.com | linkedin.com/in/imtiaz-hossain-02744a35b | github.com/imtiaz707

SUMMARY

Data Analyst who builds internal data tools, including a key-account CRM, an issue-escalation app and a delivery-SLA engine validated on 47,000+ production records. Uses Python, SQL and Power BI for analysis, and has applied machine learning in NLP and computer vision projects. Final-semester Computer Science student, hired full-time after a 3-month internship.

WORK EXPERIENCE

Junior Data Analyst | CarryBee, Dhaka, Bangladesh **Aug 2026 – Present**

- **KAM Performance CRM** *(Google Apps Script, Google Sheets, JavaScript)*: Built a CRM that tracks daily key-account and merchant KPIs, with 8 views and role-based access for 6 user roles (admin, lead, KAM, operations, hub, head).
- **TQM Issue-Resolution App:** Automated a 3-layer escalation (hub → operations → management) that moves unresolved delivery issues up after 2 hours, with KAM approve/redo, file attachments and an append-only audit trail.
- **Delivery SLA Engine:** Modeled 9 parcel-journey stages, from pickup to invoicing, against a hub-level SLA matrix to flag live breaches by region, cluster and hub; validated on a 47,052-row production export from 220 hubs.
- **Data quality:** Traced inflated aging and breach counts to missing end scans and planned timestamps, and labeled 6 never-populated export columns as “not recorded” instead of reporting false breaches.
- **Pickup Monitoring Dashboard** *(Google Apps Script)*: Delivered hub-wise, merchant-wise and agent-productivity views, counting unique merchants correctly across overlapping time slots.
- Created a seeded Python generator for a reproducible 2,549-parcel test dataset calibrated to production linehaul times.
- Deployed analytics dashboards on Render for business insights and reporting.
- Launched a central system for managing reports across departments.
- Analyzed accounts data and prepared business reports for management.

Data Intelligence & Research Intern | CarryBee, Dhaka, Bangladesh **May 2026 – Jul 2026**

- Created a Python backlog monitor (Streamlit, pandas, Plotly) on live Google Sheets data, tracking parcel backlog and zone transfers.
- Co-developed business dashboards and produced analytical reports for the Data Intelligence & Research team.

PROJECTS

Merchant Analytics Dashboard | *JavaScript (Next.js, React), ECharts, Google Sheets API, JWT* **Live Demo** | **GitHub**

- Built 6 pages (live parcel flow, cohort performance, aging, reverse journey, financials, alerts) with 8 rule-based merchant alerts, including order drop, revenue decline, invoice leakage and SLA breach.
- Secured access for 4 teams with JWT sign-in and server-enforced CSV export; reads all data in one batched Sheets API call behind a 6-hour cache that refreshes after each ETL run. The public demo uses generated data.

Customer Behavior Analysis | *Python, SQL, Power BI* **GitHub**

- Cleaned and explored the data in Python, analyzed customer segments, loyalty and purchase drivers in SQL, built an interactive Power BI dashboard, and wrote a report and stakeholder presentation with recommendations.

Mobile Sales Analytics Dashboard | *Power BI* **GitHub**

- Analyzed mobile-phone sales by time, city, model and payment method to surface sales trends, customer behavior and revenue patterns.

Tableau Dashboards | *Tableau* **GitHub**

- **HR:** headcount, demographics, satisfaction and attrition by age, gender and role.
- **Automotive:** used-car price trends by fuel type, transmission and mileage, with price forecasting.
- **Call center:** call volume, sentiment, complaint types and response time against SLA, by channel.

MACHINE LEARNING PROJECTS (ACADEMIC)

- **Lightweight "Segment Anything" Vision Model** *(computer vision, deep learning)*: preparing a research paper on a compute-efficient model that segments arbitrary objects in images for low-resource environments.
- **Emotion Intelligence System** *(NLP, machine learning)*: developed a web app that classifies emotions in chat-based conversations.
- **AI Surveillance System** *(deep learning, object detection)*: implemented real-time object detection and monitoring.
- **Video-to-Text with Speaker Recognition** *(multimodal AI)*: combined audio and visual features for speaker-aware transcription.
- **DNA-Inspired Football Score Prediction** *(database design)*: designed a structured Premier League database and proposed a DNA-sequencing-inspired approach to predict scores from historical statistics.

SKILLS

Data Analysis: SQL, Python (pandas), Microsoft Excel, Data Cleaning, Exploratory Data Analysis, Statistical Analysis, Data Quality Checks

BI & Visualization: Power BI, Tableau, Plotly, ECharts, Streamlit, KPI Reporting

Apps & Automation: Google Apps Script, Google Sheets API, JavaScript, HTML/CSS, Next.js, React, JWT Authentication, Role-Based Access Control

Machine Learning: Regression, Classification, Clustering, NLP, Computer Vision, Object Detection

Tools: Git, GitHub, GitHub Pages, Render, Jupyter Notebook

Other Programming: C, PHP

Languages: Bangla (Native), English (Fluent)

EDUCATION

B.Sc. in Computer Science and Engineering | CGPA: 3.51/4.00 — **2022 – Present (final semester)**
National Institute of Textile Engineering and Research (NITER), affiliated with the University of Dhaka

Higher Secondary Certificate (HSC) | Uttara Model College | GPA: 5.00/5.00 — **2018 – 2020**

Secondary School Certificate (SSC) | Feni Govt. Pilot High School | GPA: 4.94/5.00 — **2017 – 2018**

CERTIFICATIONS

- **Machine Learning Specialization** — DeepLearning.AI & Stanford Online — **Verify**
  Courses: Supervised Machine Learning: Regression and Classification (**Verify**) · Advanced Learning Algorithms (**Verify**)
- **SQL Specialization** — University of California, Davis — **Verify**
  Course: SQL for Data Science Capstone Project (**Verify**)
- **Statistics and Clustering in Python** — University of London & IBM — **Verify**
- **Tools for Data Science** — IBM — **Verify**
- **Preparing Data for Analysis with Microsoft Excel** — Microsoft — **Verify**
- **Advanced Data Visualization with Tableau** — Tableau Learning Partner — **Verify**
- **The Data Science Profession – Student View** — University of London — **Verify**
